

Parents. . .Share Your Experience

The Washington County Early Intervention Advisory Council is a committee of parents and community partners who advise early intervention/early childhood special education (EI/ECSE). Your experiences and participation as a parent are essential and highly valued. All parents, family members and/or guardians of children with disabilities are invited to meetings. Please join us.

This year's goals include:

- Activities to build and strengthen connections between EI/ECSE and the community.
- Coordinate EI/ECSE services to include support to families at home, school, and community.
- Encourage and provide opportunities for families to participate in advocacy activities.
